Duration	3 mins 42 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

a. 94 and 99

b. 89 and 94

c. 90 and 99 ✓

d. 90 and 100

Question **2**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The search continues from the beginning

b. The list is sorted

c. The search stops

d. The search continues in the left or right sublist ✓

Question **3**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list is very small

b. When the list is sorted ✓

c. When the list is unsorted

d. When the list contains duplicate elements

Question **4**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the right sublist
b. In the left sublist ✓
c. In the entire list
d. At the beginning of the list

Question **5**

Correct

Mark 1.00 out of 1.00

If a list contains 1000 elements, how many comparisons would a binary search typically make in the worst case?

a. 100
b. 1000
c. 10 ✓
d. 500

Question **6**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

a. O(log n) ✓
b. O👎
c. O(1)
d. O(n log n)

Question **7**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Linear search ✓
b. Binary search
c. Hash search
d. Both (1) & (3)

Question **8**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 89 and 99

b. 90 and 99 ✓

c. 90 and 94

d. 89 and 94

Question **9**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Searching ✓

b. Finding

c. Mining

d. Discovering

Question **10**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. An error is raised

b. The search is considered unsuccessful ✓

c. The last element is returned

d. The first element is returned

Question **11**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the right sublist ✓

b. In the left sublist

c. At the beginning of the list

d. In the middle of the list

Question **12**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O(n log n)
b. O(log n)
c. O(1)
d. O👎 ✓

Question **13**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Sorting elements in a list
b. Determining whether an element is present in a list ✓
c. Deleting elements from a list
d. Inserting elements into a list

Question **14**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search starts over from the beginning
b. The search continues until the end of the list
c. The search stops immediately ✓
d. The search backtracks to find duplicate elements

Question **15**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is somewhere in the middle of the array ✓
b. When the item is not the array at all
c. Item is the last element in the array or item is not there at all
d. When the item is the last element in the array
